

My son was 13 years old when we started at the Center for Bedwetting Treatment. After years of listening to his doctor that he would grow out of it, I knew something had to be done. We both were frustrated with his progress and he felt that he was the only one with the problem of not being able to control his urine during the night. Finally after watching my son day after day trying to hide his wet clothing, holding his head down being ashamed, and to embarrassed to go to sleepovers I knew something had to be done. I started an internet search. I was surprised how not only were we not alone but there was help too. The work was hard at first, but we stuck with it and through all the ups and downs, slow goings, I can proudly say that he is the most confident and happy 15 year old that I have ever seen. He thanks me for helping him, and I thank his counselor for helping me.
