

December 21, 2010

When I first heard of the Enuresis program and had read through the website I thought it was a very different approach to bedwetting. I'd never heard of quite a unique program as it.

After discussing it we decided that it was worth a try, I was going into high school still waking up in the morning wet.

It was always a worry when invited to sleep over at other peoples homes and sometimes having to miss out.

I had been to a number of doctors before, all giving temporary solutions such as medicines and alarms but they never seemed to last and eventually I would begin to wet again.

After the original consultation I had more of an idea on how the course was run and I was eager to get started. I was surprised and thrilled to see changes/improvements very quickly.

A few months later I felt that finally I was on the home stretch to becoming like all my other friends.

Enuresis has changed the way I wake up in the morning. I'd like to thank Sue K very, very much and the rest of the crew. They have all been a big help towards my success.

Thankyou everyone,
Brooke C.
