

September, 2010

The Maharaj family from Trinidad visited our clinic in Michigan.

Prassana, 9, is mid-way through treatment. His family came to the United States for a vacation. They visited mom's sister in Toronto.

When they learned our clinic was only four hours from Toronto, they planned to extend their trip for a visit to meet with their treatment specialist, Claudia. They also wanted to meet our founder, Barbara Moore.

They offered hugs and gifts when they arrived. Dad, an attorney, was so pleased to finally meet Barbara Moore and her staff.
